ST. CHARLES, MO.

C. T. MALLINCKRODT, Proprietor.

The Nursery Grounds are located half a mile south of the city on St. Charles Bottom road, a direct extension of Main street.
Announcement.

A NEW WINTER PEAR.

In Fall 1891 I will offer to the public my new Winter Pear "Krull," for which orders will be booked now to be delivered at the time above stated at the following prices:

Trees, 2 years from bud or graft. 4—6 feet, $1.50 each.

" 1 year, 2—3 feet - - - 1.00 "

This new Pear has received high eulogies of many of our most prominent horticulturists of the United States, among them Judge S. Miller, of Bluffton, Mo., Hon. Van Dorn, Chief of Pomological Section of the Department of Agriculture, Washington, D. C., who, at the meeting of Nurserymen's Association, in New York 1890, pronounced it the "most promising new Winter Pear" known now. E. A. Riehl, one of the most wide-awake fruit growers of Illinois; J. C. Evans, President, and L. A. Goodman, Secretary of Missouri State Horticultural Society, and many others of equal high standing, agree as to its merits as a "Winter Pear that will keep until Spring."

I found this variety growing in the City of St. Charles. It is of pioneer origin, brought to this county by an early settler, but somehow never disseminated. In 1866 a German saw the fruit and grafted a few trees of it, succeeding in raising two, one of which he gave to his son a Mr. J. F. Krull, who planted the tree in 1868; the other his father retained and it, as also the original, has perished. The only tree now living—except those I have raised—began to bear at six years old and has borne annual crops since; in 1888 it yielded 17 bushels and 1889 19 bushels of hand-picked fruit. Notwithstanding these heavy crops the tree stands to-day in full vigor and health, never having shown a trace of blight or other disease. This season again the tree was full of fruit buds, but owing to the mild weather of January and February the buds of this, like most other kinds, started to grow prematurely and most of them were killed by subsequent frosts; yet, there is a sprinkling of fruit to prove its vitality and quality.

The Pear is of good size, pyriform, clear lemon when ripe, of fine appearance, thick skin and very firm until quite ripe, rendering it an excellent shipper. In this regard Mr. A. A. Blumer, of Fredericktown, Mo., says: "It will bear transportation to any country." Its flavor is very pleasant, while the flesh, if not "melting", is tender and very agreeable. I kept the Pear under very ordinary conditions until April 6th, and Judge Miller wrote me under date of April 7th, 1890: "We ate the last of "Krull Pear" you sent me last January to-day, and all pronounced them excellent and in fine condition."

In introducing this Pear I think I offer something that will fill a long felt vacancy, as all our so-called Winter Pears will not last here in the southwest, especially beyond midwinter, if that long, no matter what their keeping qualities are in more northern latitudes; until now we have no real "Winter Pear," and I know this is such, and will enable us to have this delicious fruit of own raising until Spring, thus prolonging the season at least three or four months. To fruit growers it certainly will prove of great value, as they will not be so dependent upon a local market for their product on account of its shipping qualities. The fruit seldom colors fully until December and January, when it attains its full beauty and attractiveness.

Correspondence will be cheerfully and promptly answered by

Yours Respectfully,

C. T. MALLINCKRODT.

Catalogue and Price-List

OF THE

MALLINCKRODT NURSERY,

ST. CHARLES, MO.

C. T. MALLINCKRODT, Proprietor.

The Nursery Grounds are located half a mile south of the city on St. Charles Bottom road, a direct extension of Main street, where are also the Packing Grounds and Office.

Descriptive Catalogue sent on application.

With thanks for past favors, I present this Abridged Catalogue of Nursery stock. As in the past, so in the future, I will try to conduct my business in such manner as will retain the confidence and good will of all who may favor me with their orders.

Soliciting a liberal share of public patronage, I am

Very Respectfully,

C. T. MALLINCKRODT.
Terms and Conditions.

Terms: Net Cash, except by special agreement.

Small parcels sent by mail, at rates in this list, with postage added to bill.

Packing in must approved style, for which costs will be added to the bill.

Packages will be delivered to the Express, Railroad, or on board of Missouri River Packets, at St. Charles, Mo., free of cartage. When proper receipts for delivery at any of these places are procured, the goods are entirely at buyer's risk, and if lost or injured, recourse must be had on the carriers.

Errors by me will be cheerfully corrected, but should be reported at once after receipt of goods. Money may be sent by Express, Draft on St. Charles, St. Louis or New York City banks, or through Postal Order, or Registered Letter. If by private check, except on St. Louis or St. Charles, add 25 cents for collection. Parties unknown to me must accompany their orders with the cash, or give satisfactory references as to their responsibility.

All articles will be distinctly and carefully labeled before packing. Give your full Name, Postoffice, County and State, with your orders; also state by what conveyance the goods are to be sent. If this latter is omitted, I will use my best judgment, and forward accordingly; but in no case will I be responsible for losses or delays occurring through such shipments.

These quotations are for the quantities specified, except 5 at 10, 50 at 100 and 500 at 1000 rates. On orders amounting to $50.00, or more, I will give special rates. All contemplating to plant largely will please send me their list of wants and I will quote lowest figures.

Stock will be in condition to dig in Fall, after October 15th, until hard freezing. In Spring as soon as frost is out of the ground, usually about March 1st.

Order early and secure full stock to select from. "First Come, First Served."

Address: C. T. MALLINCKRODT, St. Charles, Mo.
STOCK.

My stock this season is of excellent quality throughout and assortments in all departments very complete, which facts will enable me to serve customers well. Owing to the very hot and dry summer some of the trees &c., may not quite average the same grade or age of former seasons in size, but all are well developed, healthy and vigorous, hence a little less size will be no detriment.

NEW VARIETIES.

Of these I have added some since publishing last edition of descriptive Catalogue. The descriptions here given; as well as recommendations, are based mostly on such information as I have been able to gather regarding them, and I consider all well worthy of a trial, but do not as yet advise extensive plantations to be made until they have proven their adaptability to our soil, climate, &c., &c.

DIRECTIONS ON PLANTING.

SITE.

Elevated ground of a warm porous character is best for all kinds of fruit. If wet or retentive soils must be used, underdrain well. The land should be in good fertility, or be made so.

PREPARATION.

If practicable, plow the orchard plot 15 to 20 inches deep before planting; or if that cannot be done at the time, then plow a strip 4—6 feet wide where the row is to be, into which plant the trees. This method will be found cheaper, more expeditious and better than to dig mere holes, but if holes must be dug, let them be at least three feet wide and one and a half feet deep; refill with top-soil and use only the best earth around the roots.

PREPARATION OF THE PLANT.

After receiving the plants examine them, and if found anyways dry or wilted, wet the roots and then heel them in in finely pulverized soil, where they will soon become fresh and plump, unless too far gone. Do not expose the roots more than necessary to the sun and air while handling them. Cut out all bruised and broken roots, also cut the ends of such roots as were servered by digging until they appear fresh; always cut from underside out, so that the wound faces downward. Remove all surplus branches close to the stem and cut the rest back to a few inches in length. This cutting back is of vital importance and should never be neglected.
PLANTING.

If the ground was plowed as before directed, throw out a hole sufficiently wide and deep to allow ample room to spread the roots and to bring the tree to proper depth. If holes were dug then fill them up until the plant will stand at right depth, raise a mound in the center to fit the loose dirt slowly at the stem and work in well between the roots, which should be drawn outward by passing the fingers through them. *Avoid bunching the rootlets and let them be spread as evenly as possible.* After the roots are well covered, press the base of the cone that will have been formed gently with the foot, then fill the hole up forming a basin around the tree, into which pour a pale of water, hold the tree in an upright position until the water settles, after which fill the basin up with good soil. *Do not tread the soil after watering.* The principal object of watering at planting is to settle the soil closely around the roots and thus enable them to draw nourishment from the earth at once and sustain the tree.

CARE AFTER PLANTING.

Keep the ground around the trees clear of weeds and the surface loose and friable, or, where cultivation is impracticable, a covering of rotten straw should be laid around the tree, say 6 inches thick and to extend two feet away from the stem. Leaves, shavings, cut weeds, &c., will answer for this “mulch” where straw is not handy. But a loose surface is the best “mulch” and should be always preferred. Take care of your trees if you want to succeed. To plant trees and then let them take care of themselves, is time, money and labor wasted.

SUMMER VARIETIES.

Amer. Summer Permain.—Large red, August.
Duchesse of Oldenburg.—(Russian.) Large red, August.
Early Harvest.—Full medium, yellow, July.
Maiden Blush.—Large, yellow, red cheek, August.
Matson, or Smiley's Red.—Large, bright red, August and Sept.
Red Astrachan.—(Russian.) Medium to large, red, July.
Red June.—Small to medium, dark red, July.
Red Bietigheimer.—Large, white, spotted red, of German origin, season late summer.
Sweet Bough.—Large, clear yellow, very sweet, August.
Summer Bellflower.—Large, striped, season end of August.
Summer Queen.—Full medium, red, late summer.
Trenton Early.—Large, waxen yellow, red cheek, one of the best for summer market, August.
Yellow Transparent.—(Russian.) Very early, good quality, yellow, fine shipper.

AUTUMN VARIETIES.

Drop d'Or.—Very large, yellow, September.
Fall Pippin.—Large, greenish-yellow, September and October.
Milam.—Medium size, dark red, excellent, October.
Northern Spy.—Large, red, good market, September and October.
Pennock.—Large, red, good market, September and October.
Porter.—Above medium, lemon, fine, September.
Pa. Redstreak.—Very large, bright red, market or table, September and October.
Rambo.—Well known, one of best, October.
Rome Beauty.—Large, red, very fine, October.
Wealthy.—Large, red, beautiful, September.
Yellow Bellflower.—Large, yellow, red cheek, one of best, October and November.
WINTER VARIETIES.

Ben. Davis.—Large, red, fine market sort, October to January.
Carthouse.—(Small Romanite.) Red, late keeper, Dec. to April.
Ewing’s Mo.—Large, red, succeeds on heavy loam, Dec. to March.
Gano.—Much like Ben. Davis, its parent.
Grimes Golden.—Above medium size, greenish yellow, October to January.
Huntsman.—Large, greenish yellow, bronze cheek, Nov. to Feb.
Indian.—(New.) Large, red, good quality, fine keeper.
Jonathan.—Medium to large, beautiful red, very good for all purposes, early winter.
Lawyer.—Large, deep red, long keeper.
Mammoth Janet.—A seedling of “Janet”, larger, more flattened, all winter.
Newton Spitzenburg.—(Vandevere). Size medium, dark red, November to February.
Newton Pippin.—Large, greenish yellow, December to March.
Pryor Red.—Size medium, red, russety, late keeper.
Rawle’s Janet.—(Janet). Known by all.
Salome.—Size medium, dull red, good keeper.
Smith’s Cider.—Large, bright red, November to January.
Sweet Janet.—Medium, bright red, very sweet, Nov. to Jan.
Willow Twig.—Large, dull red, good market, Dec. to March.
White Pippin.—Large, light yellow, long keeper.
Winter Permain.—Medium, greenish white, Nov. to February.

CRAB APPLES.

Golden Beauty.—Very beautiful.
Hyslop.—Large, very beautiful color, late.
Hugh’s Cider.—Best cider crab known.
Harrison Cider.—Name indicates use, good.
Lady Apple.—Yellow, with red cheek, good dessert, long keeper.
Transcendant.—A fine, large, red crab.
Tetofsky.—(Russian.) Very early, slightly streaked, desert.
Yellow Siberian.—Small, yellow and red, best preserving.

NEW APPLES.
The following varieties have lately been added to our collection:

Price: One year trees 25 cents each.

Babbitt.—A seedling of “Baldwin”, which the fruit much resembles. Being of western origin it is better adapted to our location than the parent. Tree of fine symmetrical habit, hardy, growthy and said to be very productive. A good keeper and valuable market apple.
Woodmausee.—This variety comes to me from northwest Missouri through a friend who recommends it very highly. To judge from its growth with me I think it will be valuable and well worthy a trial.
PEARS.

Prices: Standard, first class 4 - 6 feet .......... $  50  50  100
      " lighter, good, 3 - 5 feet ........  35  30  20
Dwarf, 2 year, heavy ........................  40  35  25
      "  "  2 " good trees ..................  30  25  20

VARIETIES.

Bartlett. - Universally known, generally holds first place.
Beurre d'Aujou. - Large, smooth, excellent, autumn.
Beurre Clairgeau. - Fruit large, bronze, fine, late autumn.
Buffam. - Fruit small to medium, very sweet, melting, Sept.
Clapp's Favorite. - Large, yellow and bronze, early.
Duchesse Angouleme. - Very large, yellow, best dwarf tree, Sept.
Flemish Beauty. - Large, very beautiful, sweet, August and Sept.
Howell. - Large, lemon color, delicious, ripe August 20 to September 10; one of best.
Keiffer. - Fruit large, yellow, beautiful, quality good, blight proof.
Lawrence. - Medium size, good, October and November.
Le Conte. - Fruit large, greenish yellow, August and September.
Louise Bonne. - Fruit long, bronzed, very good, Sept. and Oct.
Seckel. - A universal favorite, August and September.

NEW VARIETIES.

Idaho. - This new Pear originated in Idaho and appears to be a seedling of Duchesse. The fruit is large and very handsome; ripening, it is said, with Bartlett. The tree resembles its parent very much. Price: One year 2 - 3 feet $1.50 each.

Garber. - Fruit large to very large, of excellent quality, late summer. The tree is exceedingly vigorous, and being of Japan hybrid origin, it is less subject to "blight" than the old sorts. Price: Trees one year 3 - 5 feet 75 cents.

QUINCES.

Price: 2 years, stocky plants ................... $  40  3 00
Champion. - Large, greenish yellow, late.
Orange. - Large to very large, clear, yellow.
Meech's Prolific. - A good new sort.
STONE FRUITS.

APRICOTS.

* Price 30 cents each, $2.50 per 10.

COMMON VARIETIES.
- Breda.—A hardy and very productive sort.
- Early Golden.—Large, round, deep yellow.
- Moorpark.—Of English origin, fine.
- Peach.—An old and highly esteemed kind.

RUSSIAN VARIETIES.
- Alexander.—Fruit large, yellow, tree very hardy.
- Gibb.—Fruit medium, tree very hardy and productive.
- Catharina.—A good sort.
- Nicholas.—White, of medium size, late.
- J. L. Budd.—By many called the best of the Russian sorts.

CHERRIES.

Price: 2 year trees, first size ......................... $35 $3 00 $20 00
1 or 2 year, nice ...................................... 25 2 00

SWEET VARIETIES.
- Black Eagle.—Medium size, very sweet, medium season.
- Black Tartarian.—Large, sweet, flesh firm, season medium.
- Elton.—Large, white, flesh firm, early, one of best.
- Goo Wood.—Large, round, white, flesh firm, medium, early.
- Napoleon Bigameau.—Large, pale red, delicious, medium, late.
- Yellow Spanish.—Large, yellow, flesh firm, medium, early.
- White Heart.—A very profuse bearer, sweet and delicious.
- Reine Hortense.—Large, pale red, delicious, late.

SOUR VARIETIES.
- Belle de Choisy.—Size medium, light red, hardy, mild, late.
- Early Richmond.—Well known, pies, &c.
- Large Montmorency.—Like foregoing, but later.
- Lieb.—Resembles the foregoing, a good late sort.
- May Duke.—In my judgment the best of all.
- Olivet.—A very fine late cherry of the Richmond class.
PLUMS.

Price: Trees 1 year 2-3 feet. 8 25 82 00
" 1 or 2 year, 4-6 feet. 35 3 00
Foreign sorts. 50 4 50

NATIVE VARIETIES.

Damson.—Generally known and esteemed.
Marianna.—Obove medium size, bright red, early.
Minor.—Good size, very firm, fine color, late.
Newman.—Ablong, bright red, late, valuable.
Red Chicasaw.—Much like “Minor,” but larger.
Wild Goose.—Large, beautiful, early.
Yellow Chicasaw.—Yellow, sweet, earliest.

FOREIGN VARIETIES.

Coe’s Golden Drop.—Good size, yellow, excellent.
German Prune.—Large, oblong, blue, none better.
Imperial Gage.—A fine large plum.
Lombard.—A native of foreign parentage.
English Damson.—Larger than the native Damson.

PEACHES.

Price: Extra size. 8 25 82 00
3-5 feet, stocky. 20 1 50 12 50

FREESTONES.

Amsden. These five sorts resemble each other so closely
that it is difficult to distinguish them from
Alexandria one another. All are “Hale’s” seedlings.
Congling. All are very early, and valuable on that
Gov. Garland. account.
Waterloo.
Beatrice.—Small to medium, red, early.
Crawford’s Early.—Large, yellow, beginning of August.
Crawford’s Late.—Very large, yellow, September.
Early Rivers.—Medium size, white, early.
Foster.—Large, yellow, ripens with Crawford’s Early.
Geo. IV.—A well known excellent sort, first of August.
Heath Free.—Large, white to seed, late.
Mammoth Melocoton.—Very large, yellow, late.
Old Mixon Free.—Large, red cheek, season medium.
Red Cheek Melocoton.—Large, yellow and red, late medium.
Salway.—A fine large, yellow flesh, very late.
Smock.—Good size, yellow, has a widespread reputation as a mar-
ket variety.
Stump the World.—Large, red, no better for market, season medium.
Steadley.—Large, greenish white, very late.
Troyh’s Early.—Not large, third early, red.
Ward’s Late.—Size medium, red, late.

CLINGSTONES.

Early Lemon.—Large, yellow, season with Mixon cling.
Emmons.—Large, white and red, season medium.
Heath’s Lemon.—An old well known kind, late.
Lemon Cling.—Large, yellow, very beautiful, medium late.
Large White Cling.—Very large, white with red cheek, late.
Old Mixon Cling.—Large, white and red, season 15th August.
Washington Cling.—Very large, white and red, late.

GRAPES.

N. B.—Parties wishing to buy largely and will send me their list, I will quote very low rates.

All stock at these prices are strong, strictly choice one or two year plants.
